Human Capital Management - **Time Management**

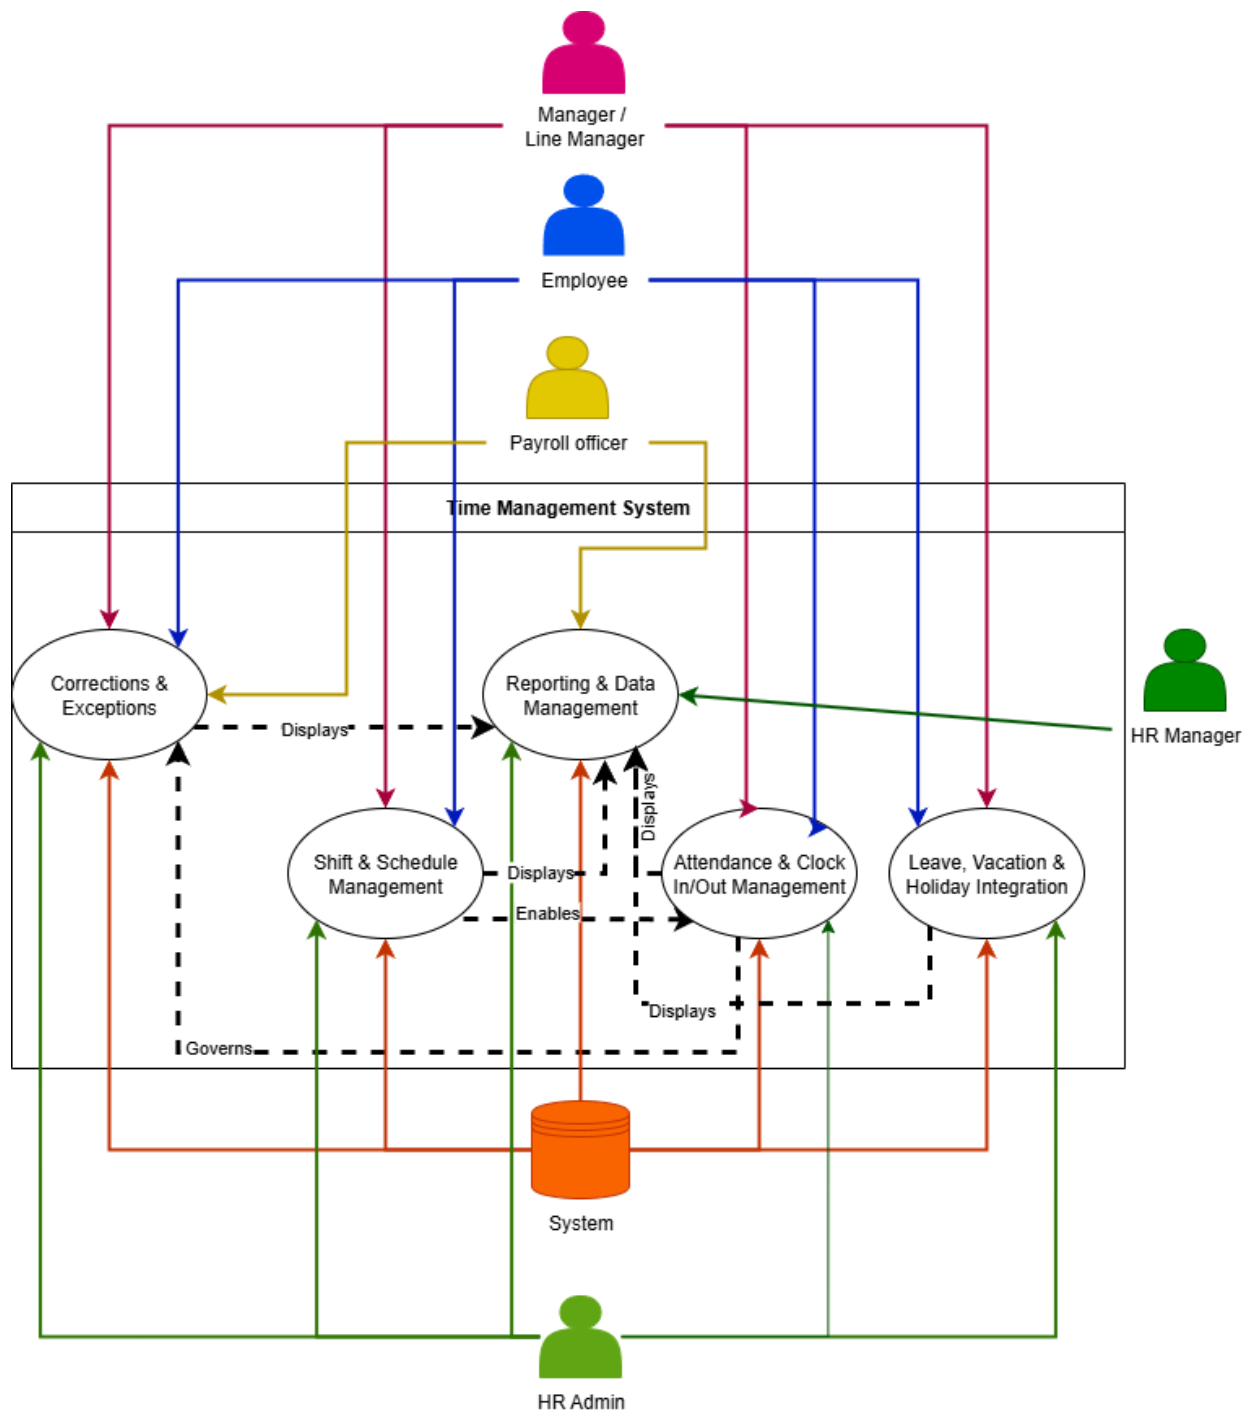

FUNCTIONAL SPECIFICATION DOCUMENT

Executive Summary

The **Time Management Module** is designed to manage and monitor employee attendance, working hours, and shift schedules in a structured and policy-compliant way. It supports a wide range of scheduling options, including fixed core hours, rotational shifts, split shifts, overnight work, and flexible patterns, allowing organizations to accommodate diverse workforce needs. Attendance can be captured through biometric terminals, web login, mobile applications with GPS verification, or manual input with full audit trails, ensuring accuracy and accountability.

The module also enforces organizational rules for overtime, short time, and lateness through configurable policies such as grace periods, rounding methods, penalty thresholds, and escalation rules. Employees can submit correction or permission requests for missed punches or exceptions, which follow a transparent approval workflow involving Line Managers, HR, and payroll. Integration with vacation packages, holidays, and weekly rest days ensures that attendance data aligns with actual working time and prevents scheduling conflicts.

With real-time synchronization to payroll, benefits, and leave systems, the module guarantees that attendance data directly impacts compensation and compliance. Managers and HR gain access to powerful reporting and dashboards that provide insights into overtime, lateness, and attendance trends at both individual and departmental levels. By automating time tracking, enforcing policies, and providing clear visibility, the Time Management Module enhances organizational efficiency, fairness, and workforce productivity.

Business Processes

1. Shift & Schedule Management

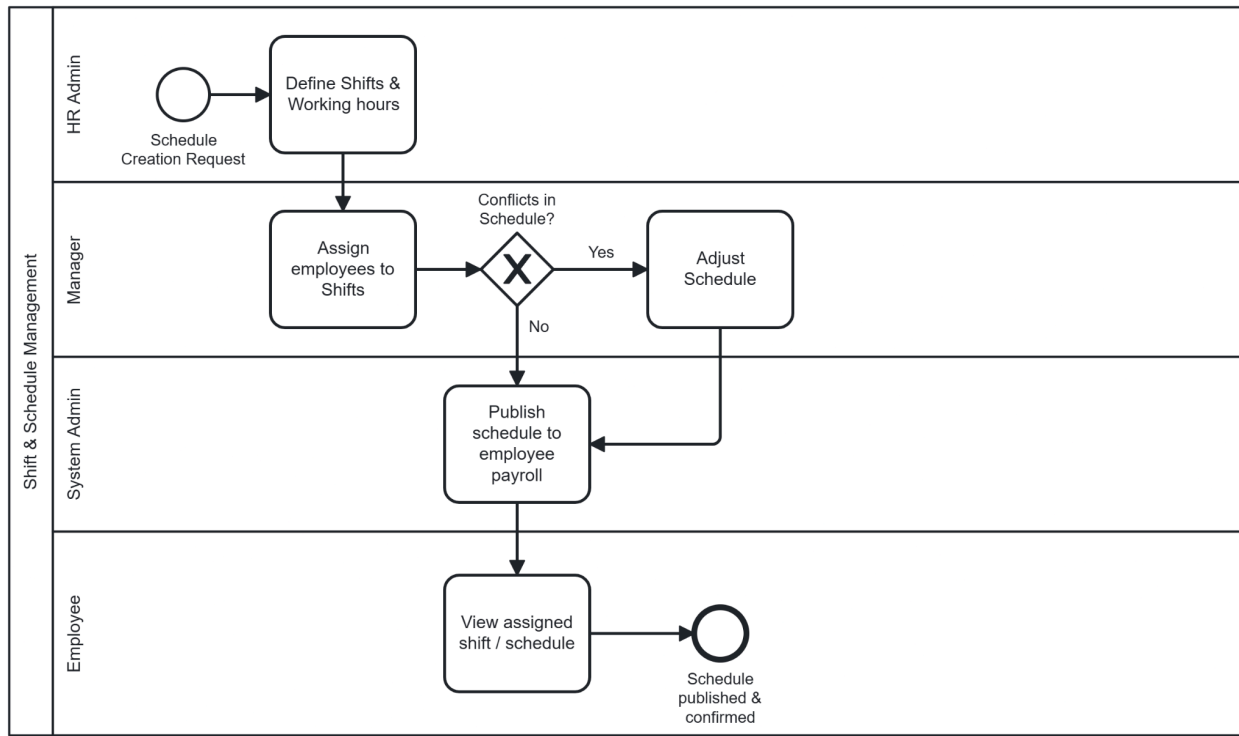

This process defines how employee work schedules and shifts are created, assigned, and managed across the organization. It includes the configuration of **shift types** (e.g., normal, split, overnight, rotational, mission) and **shift names** (e.g., fixed core hours, flexible time, custom weekly patterns). Shifts can be assigned by **department, job role, or individual employee**, ensuring that organizational needs and workforce availability are aligned.

The system also supports **status tracking** (approved, submitted, cancelled, expired, etc.), allowing administrators and managers to maintain an accurate and transparent record of shift allocations. By standardizing shift definitions, organizations can achieve consistency while also supporting flexibility for non-traditional schedules.

1.1. Use Cases

1.2. Business Process

1.3 User Stories

Requirement ID	Epic	User Story Summary
REQ-SM-01	Shift & Schedule Management	As a System Admin, I want to assign shifts (with names and types) to employees for a specified term so that their work schedules are clearly defined.
REQ-SM-02	Shift & Schedule Management	As a System Admin, I want to update shift statuses (Approved, Cancelled, Entered, Expired, Postponed, Rejected, Submitted) so that shifts reflect their current state.
REQ-SM-03	Shift & Schedule Management	As an HR Manager, I want to define multiple shift types (Normal, Split, Overnight, Mission, etc.) so that various work arrangements are supported.
REQ-SM-04	Shift & Schedule Management	As an HR Manager, I want to create and manage shift names (Core Hours, Flex Time, Rotational, etc.) so that the organization has standardized scheduling.
REQ-SM-05	Shift & Schedule Management	As an Employee, I want to work under flex-in/flex-out rules so that I can complete my required hours within flexible timing.
REQ-SM-06	Shift & Schedule Management	As an HR Admin, I want to assign employees to rotational shifts (Morning/Evening/Night) so that workloads are distributed evenly.
REQ-SM-07	Shift & Schedule Management	As an HR Manager, I want to create custom weekly patterns (e.g., 4 days work + 3 days off) so that non-standard schedules are supported.
REQ-SM-08	Shift & Schedule Management	As a System Admin, I want to configure split shifts (e.g., 8–12, 4–8) so that coverage is provided across non-continuous hours.
REQ-SM-09	Shift & Schedule Management	As a System Admin, I want to assign shift schedules by department so that large groups are managed efficiently.

Requirement ID	Epic	User Story Summary
REQ-SM-10	Shift & Schedule Management	As a System Admin, I want to assign shifts by job role/position so that certain roles have predefined hours.
REQ-SM-11	Shift & Schedule Management	As a System Admin, I want to assign custom shifts to individual employees so that unique contracts are respected.
REQ-SM-12	Shift & Schedule Management	As an HR Admin, I want to be notified when a shift assignment is nearing expiry so that schedules can be renewed or updated.

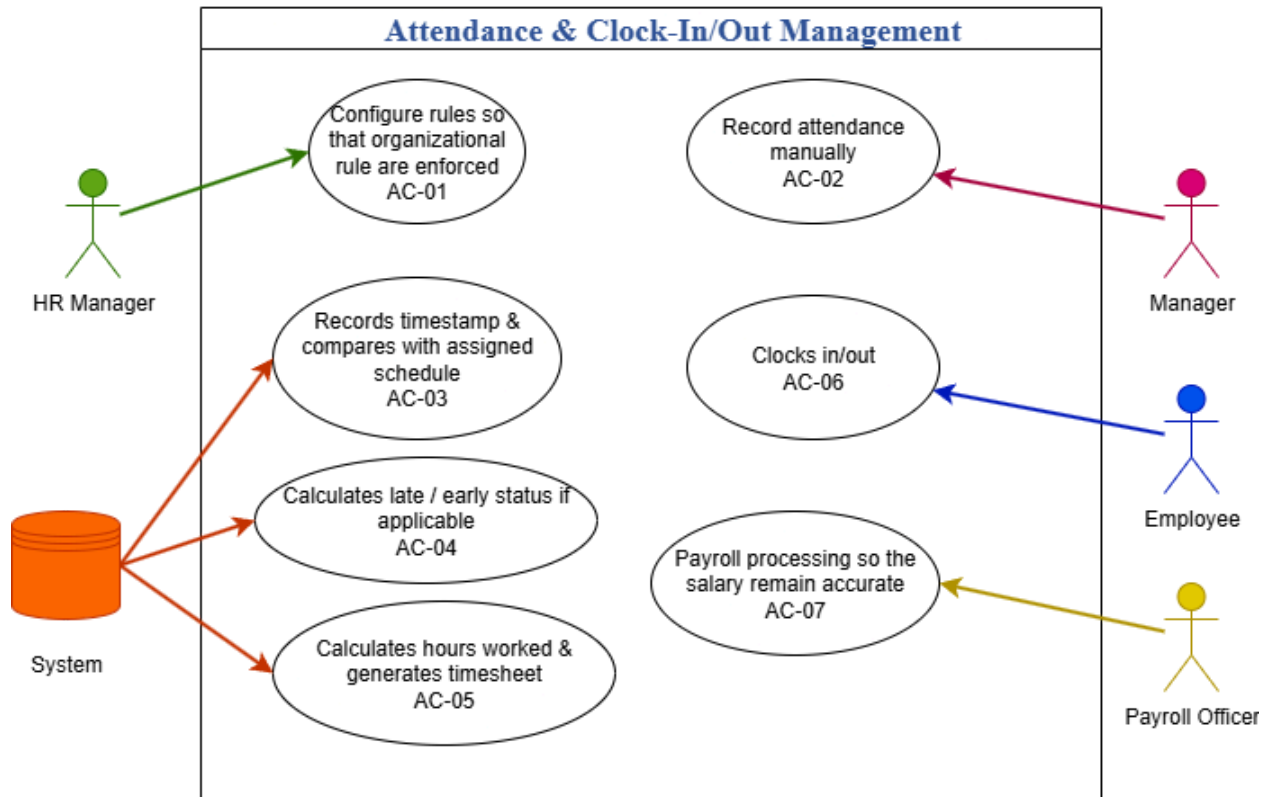

2. Attendance & Clock-In/Out Management

This process manages how employee attendance is recorded, validated, and synchronized with the HR system. Employees can **clock in/out** using multiple methods, including biometric devices, web login, mobile apps with GPS, or manual input with an audit trail.

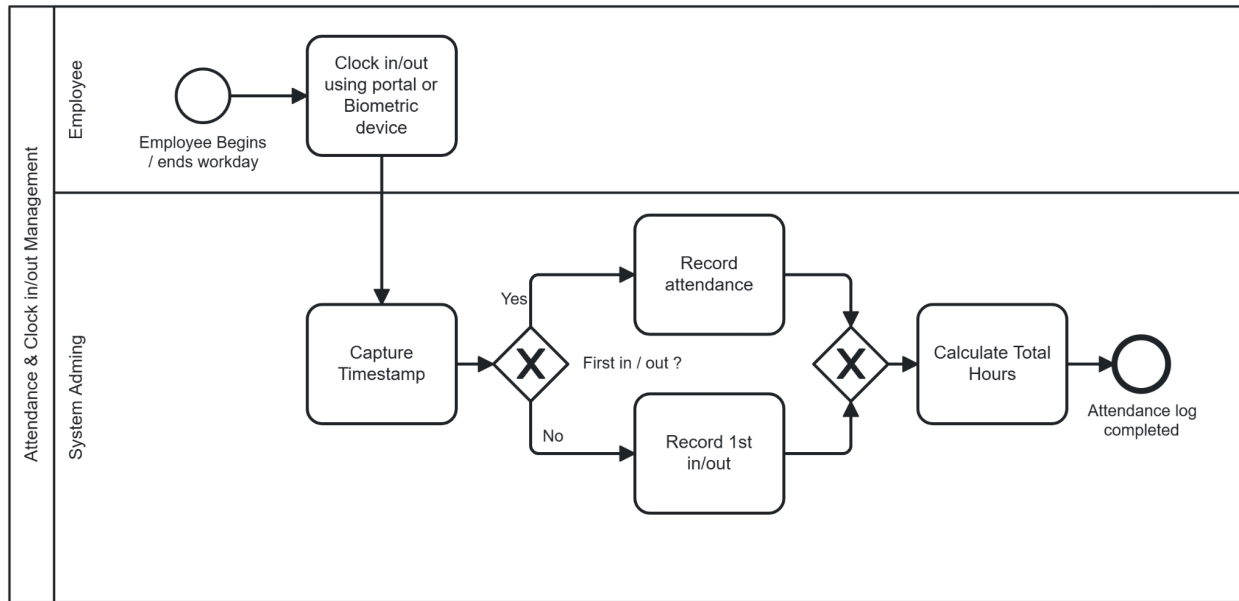

The process also includes rules for **rounding clock-in/out times**, configuring multiple punches per day, enabling “first in/last out” simplifications, and ensuring attendance records are **location-verified**. Offline devices sync automatically once online, preventing data loss.

The system also handles **missed punches** by auto-flagging them, notifying employees and Line Managers, and even blocking payroll processing until corrections are made. All actions are **timestamped and audit-tracked** to ensure compliance and transparency.

2.1. Use Cases

2.2. Business Process

[Attendance & Clock in_out Management.png](#)

2.3 User Stories

Requirement ID	Epic	User Story Summary
REQ-AT-01	Attendance & Clock-In/Out	As an Employee, I want to clock in/out using biometric terminals so that my attendance is automatically captured.
REQ-AT-02	Attendance & Clock-In/Out	As an Employee, I want to clock in/out via web login so that remote work is tracked.
REQ-AT-03	Attendance & Clock-In/Out	As an Employee, I want to clock in/out using the mobile app with GPS tagging so that my location is verified.
REQ-AT-04	Attendance & Clock-In/Out	As a Line Manager, I want to record attendance manually (with an audit trail) so that missing punches can be corrected.
REQ-AT-05	Attendance & Clock-In/Out	As an HR Manager, I want clock-in/out data to be rounded to nearest 5/10/15 minutes so that reporting is standardized.
REQ-AT-06	Attendance & Clock-In/Out	As an HR Manager, I want to configure ceiling/floor rounding rules so that organizational rules are enforced.
REQ-AT-07	Attendance & Clock-In/Out	As an Employee, I want to be able to clock in/out multiple times a day so that breaks and split shifts are tracked.
REQ-AT-08	Attendance & Clock-In/Out	As a System Admin, I want the option to only record first in/last out so that attendance processing is simplified.
REQ-AT-09	Attendance & Clock-In/Out	As a System Admin, I want attendance tagged by device, terminal ID, or GPS so that records can be verified.
REQ-AT-10	Attendance & Clock-In/Out	As a System Admin, I want attendance devices to store records offline and sync later so that no data is lost.

Requirement ID	Epic	User Story Summary
REQ-AT-11	Attendance & Clock-In/Out	As an Employee, I want to be notified when I miss a punch so that I can correct it.
REQ-AT-12	Attendance & Clock-In/Out	As a Line Manager, I want the system to flag missed punches automatically so that I can review them.
REQ-AT-13	Attendance & Clock-In/Out	As a Payroll Officer, I want payroll processing to block unresolved missed punches so that salaries remain accurate.
REQ-AT-14	Attendance & Clock-In/Out	As an HR Admin, I want attendance records to sync daily to payroll and benefits so that all systems are aligned.
REQ-AT-15	Attendance & Clock-In/Out	As a System Admin, I want all clock edits to be logged with timestamps so that manipulation is prevented.

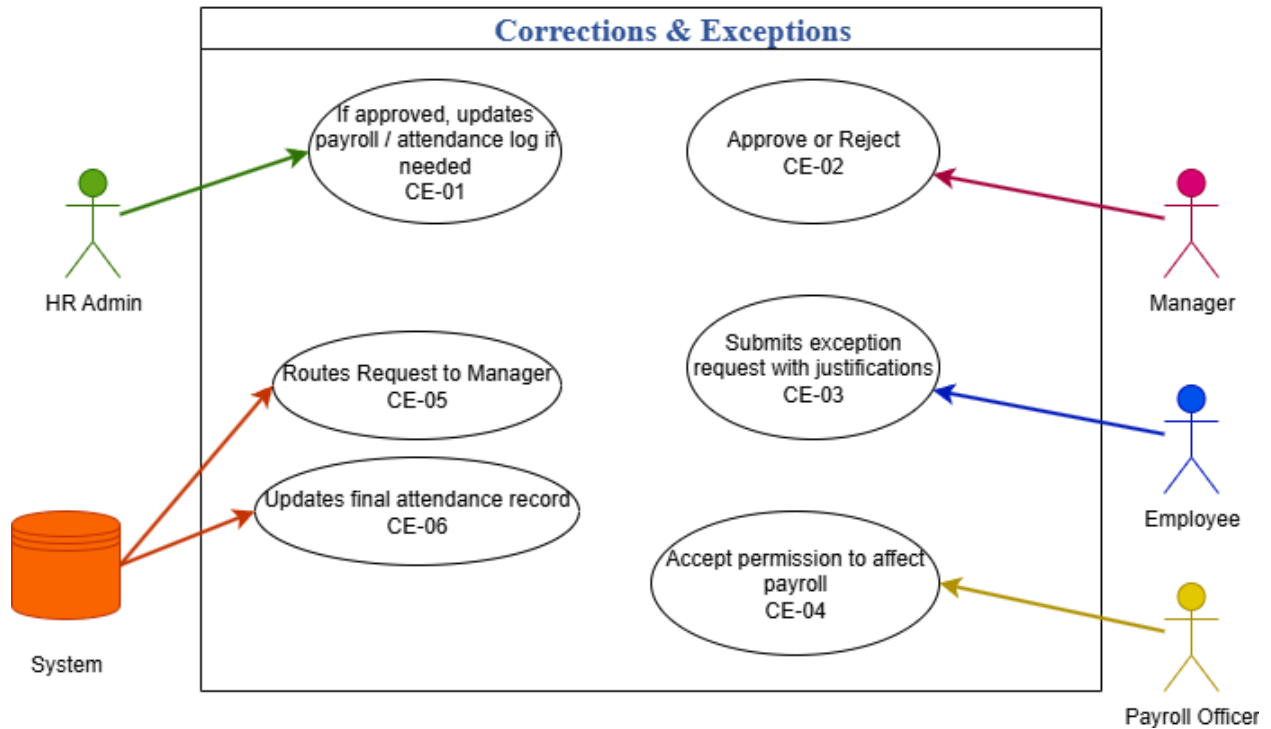

3. Corrections & Exceptions

This process governs the handling of **exceptions to normal working hours**, including overtime (extra hours worked) and short time (lateness or early leaving). HR configures rules for categories such as **weekend overtime**, **holiday overtime**, **early in/late out**, and sets **calculation methods** (rounded, exact, minimum thresholds).

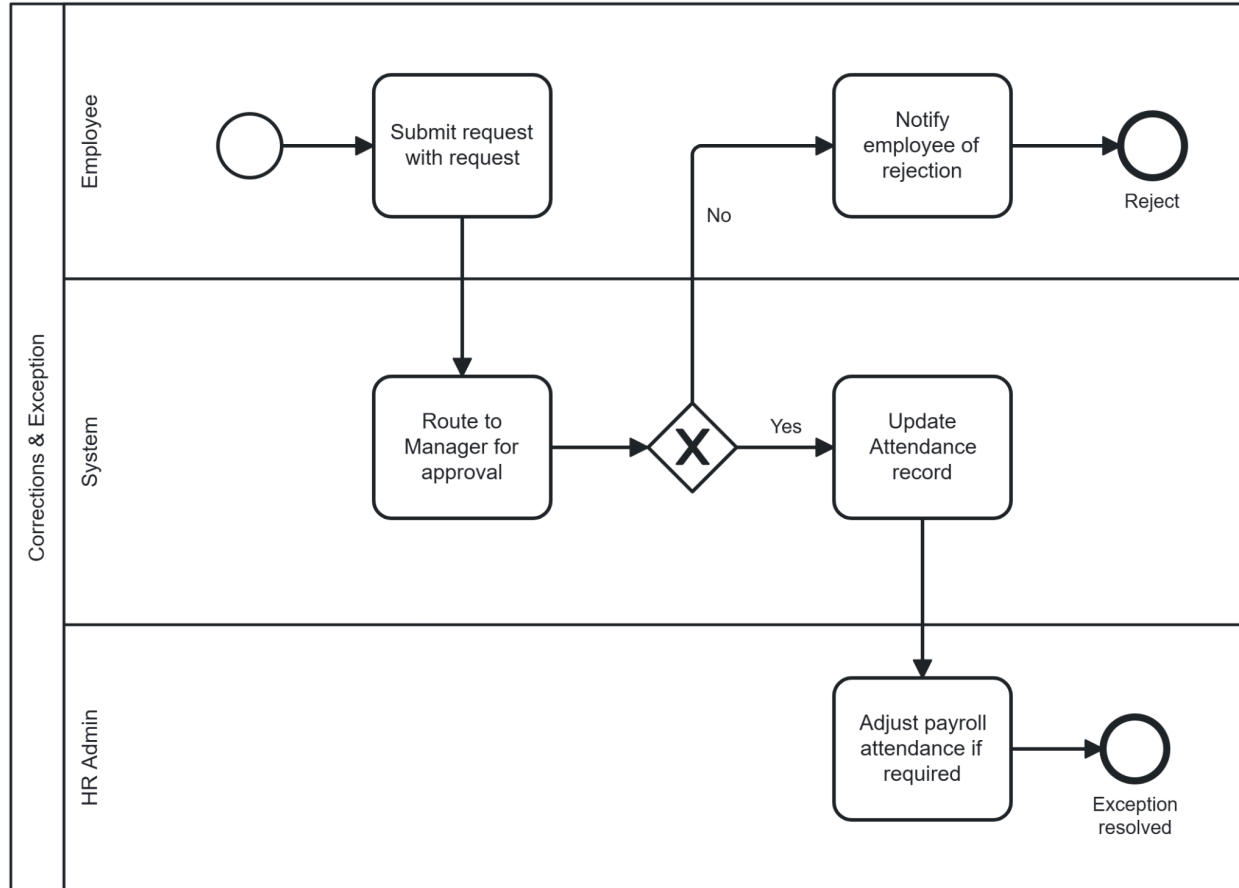

Employees can submit **permission or correction requests** (e.g., for missed punches, overtime claims), which are directed to Line Managers for approval or rejection. If requests are not reviewed within a defined timeframe, they **auto-escalate** to higher management.

This process also ties into the **misconduct module**, where repeated lateness or early leaving triggers disciplinary actions. Accepted or rejected permissions directly influence **payroll calculations**, ensuring fairness and compliance with policies.

3.1. Use Cases

3.2. Business Process

[Corrections & Exception.png](#)

3.3 User Stories

Requirement ID	Epic	User Story Summary
REQ-PE-01	Corrections & Exceptions	As an HR Manager, I want to configure overtime categories (weekend, holiday, pre-approved) so that labor laws are followed.
REQ-PE-02	Corrections & Exceptions	As an HR Manager, I want to define rules for short time (late arrivals, early outs) so that deductions are applied consistently.
REQ-PE-03	Corrections & Exceptions	As an HR Manager, I want to set grace periods (e.g., first 10 mins free) so that minor lateness is tolerated.
REQ-PE-04	Corrections & Exceptions	As an HR Manager, I want to set thresholds (e.g., >15 mins late = half-day deduction) so that penalties are automatic.
REQ-PE-05	Corrections & Exceptions	As an HR Admin, I want lateness violations to escalate after multiple repeats so that discipline is enforced.
REQ-PE-06	Corrections & Exceptions	As an Employee, I want to submit a correction request for missed or incorrect punches so that my attendance is accurate.
REQ-PE-07	Corrections & Exceptions	As an Employee, I want to view the status of my correction or overtime requests so that I know if they are approved or rejected.
REQ-PE-08	Corrections & Exceptions	As a Line Manager, I want to approve or reject time management requests so that exceptions are controlled.
REQ-PE-09	Corrections & Exceptions	As an HR Admin, I want pending requests to escalate to higher managers after a deadline so that nothing is left unresolved.
REQ-PE-10	Corrections & Exceptions	As a Payroll Officer, I want only accepted permissions to affect payroll so that calculations remain accurate.

Requirement ID	Epic	User Story Summary
REQ-PE-11	Corrections & Exceptions	As an HR Admin, I want to define minimum/maximum hours allowed for permissions so that misuse is prevented.
REQ-PE-12	Corrections & Exceptions	As an HR Manager, I want repeated lateness linked to the misconduct module so that disciplinary actions can be triggered.

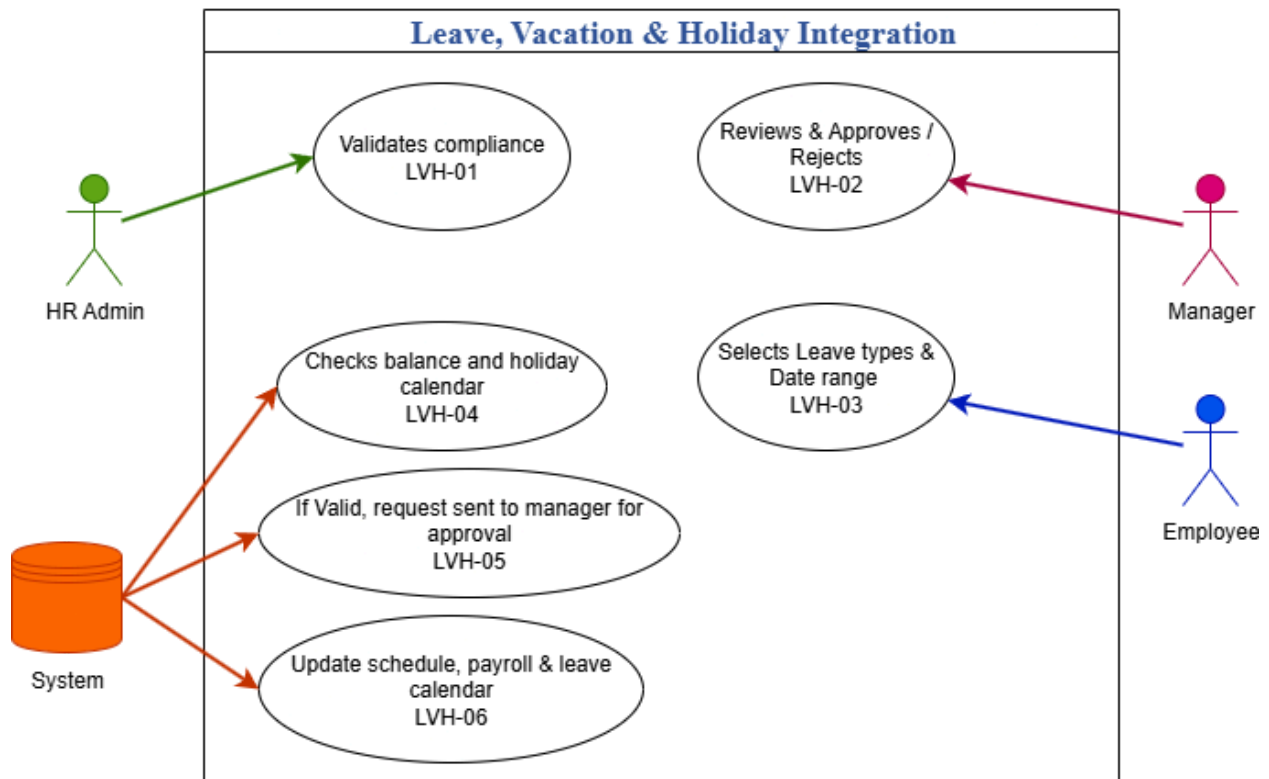

4. Leave, Vacation & Holiday Integration

This process ensures that **holidays, vacations, and weekly rest days** are seamlessly integrated with the time management system. National and organizational holidays automatically override default shift assignments, while **vacation packages** are linked to employee profiles for easy tracking.

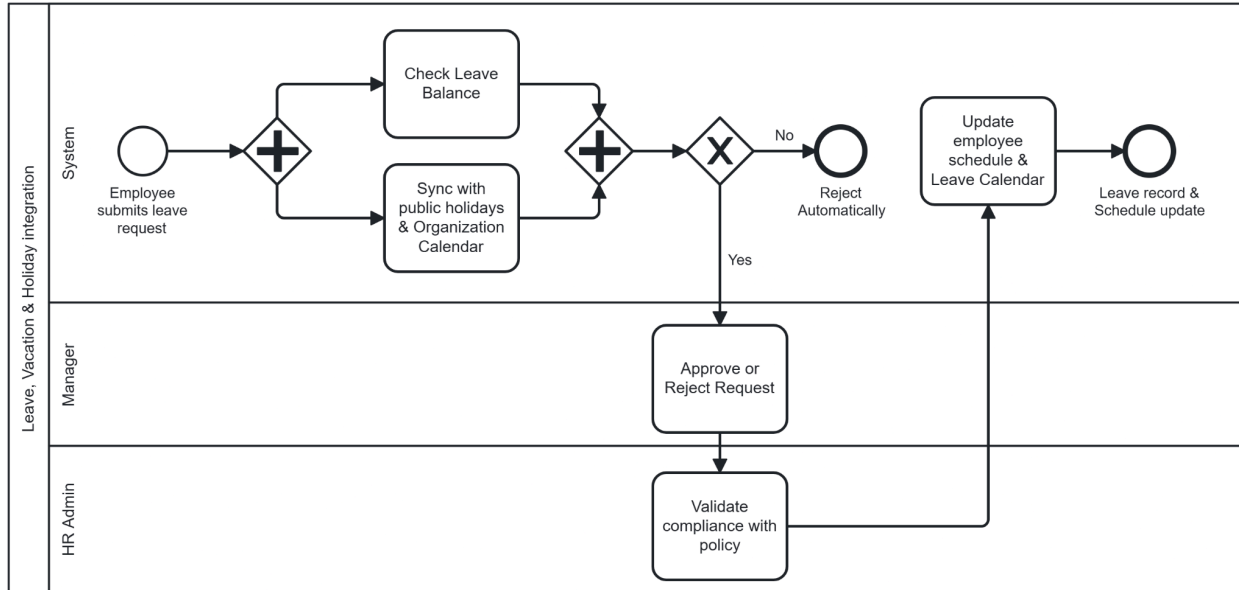

Weekly rest days are predefined in schedules, ensuring consistency and legal compliance. The system also considers **probationary rules**, where different attendance policies may apply to new employees.

To prevent payroll delays, unreviewed leave and holiday-related requests automatically **escalate** before payroll cut-off dates. This integration guarantees that attendance data reflects actual working time without conflicts with approved leave or holidays.

4.1. Use Cases

4.2. Business Process

[Leave, Vacation & Holiday integration.png](#)

4.3 User Stories

Requirement ID	Epic	User Story Summary
REQ-LV-01	Leave, Vacation & Holiday Integration	As an HR Manager, I want vacation packages linked to employee schedules so that time off is accounted for.
REQ-LV-02	Leave, Vacation & Holiday Integration	As a System Admin, I want national holidays to override default shifts so that no one is scheduled during public holidays.
REQ-LV-03	Leave, Vacation & Holiday Integration	As an HR Admin, I want organizational holidays to be defined so that internal events are respected.
REQ-LV-04	Leave, Vacation & Holiday Integration	As an HR Admin, I want weekly rest days predefined so that recurring days off are consistent.
REQ-LV-05	Leave, Vacation & Holiday Integration	As a Line Manager, I want holidays to automatically adjust attendance rules so that employees aren't penalized.
REQ-LV-06	Leave, Vacation & Holiday Integration	As an HR Manager, I want probation dates tied to time rules so that new hires follow special policies.
REQ-LV-07	Leave, Vacation & Holiday Integration	As a System Admin, I want leave and time requests to escalate if not reviewed before end of month so that payroll closes on time.

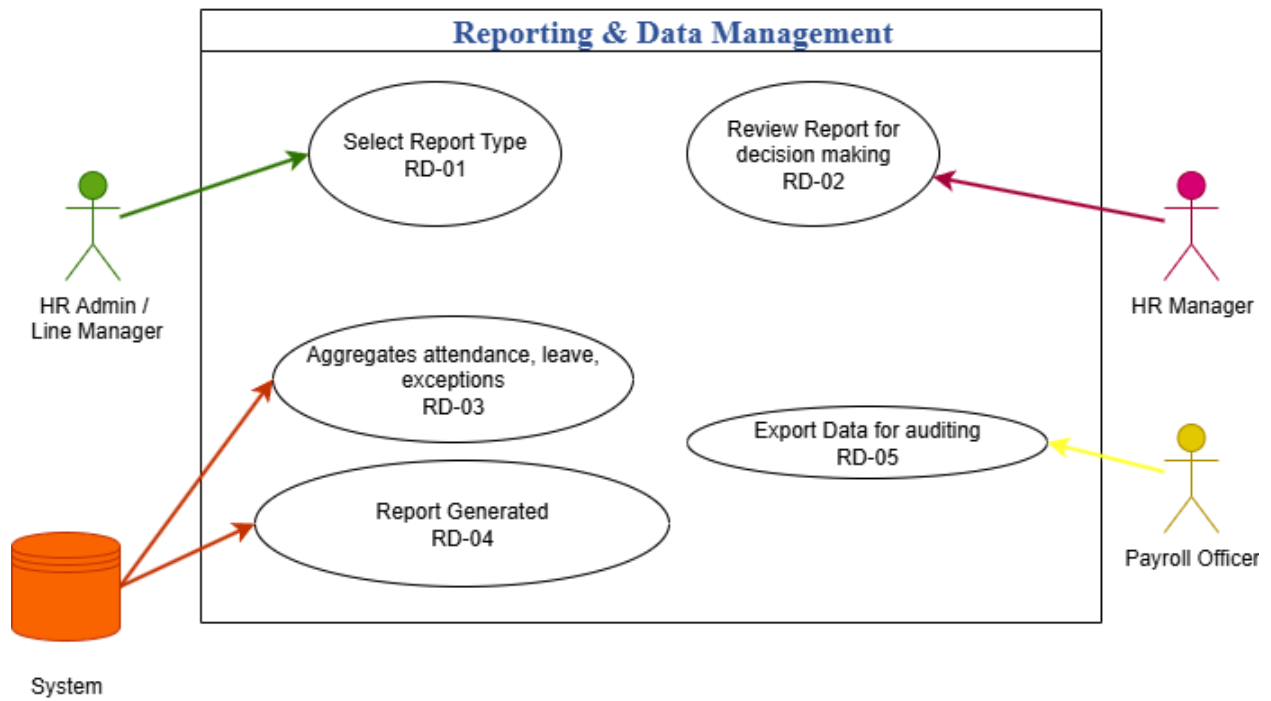

5. Reporting & Data Management

This process provides **reporting, analytics, and data management** capabilities for time and attendance. HR admins, Line Managers, and payroll officers can generate **daily, weekly, and monthly reports** covering attendance summaries, overtime, late arrivals, and exceptions.

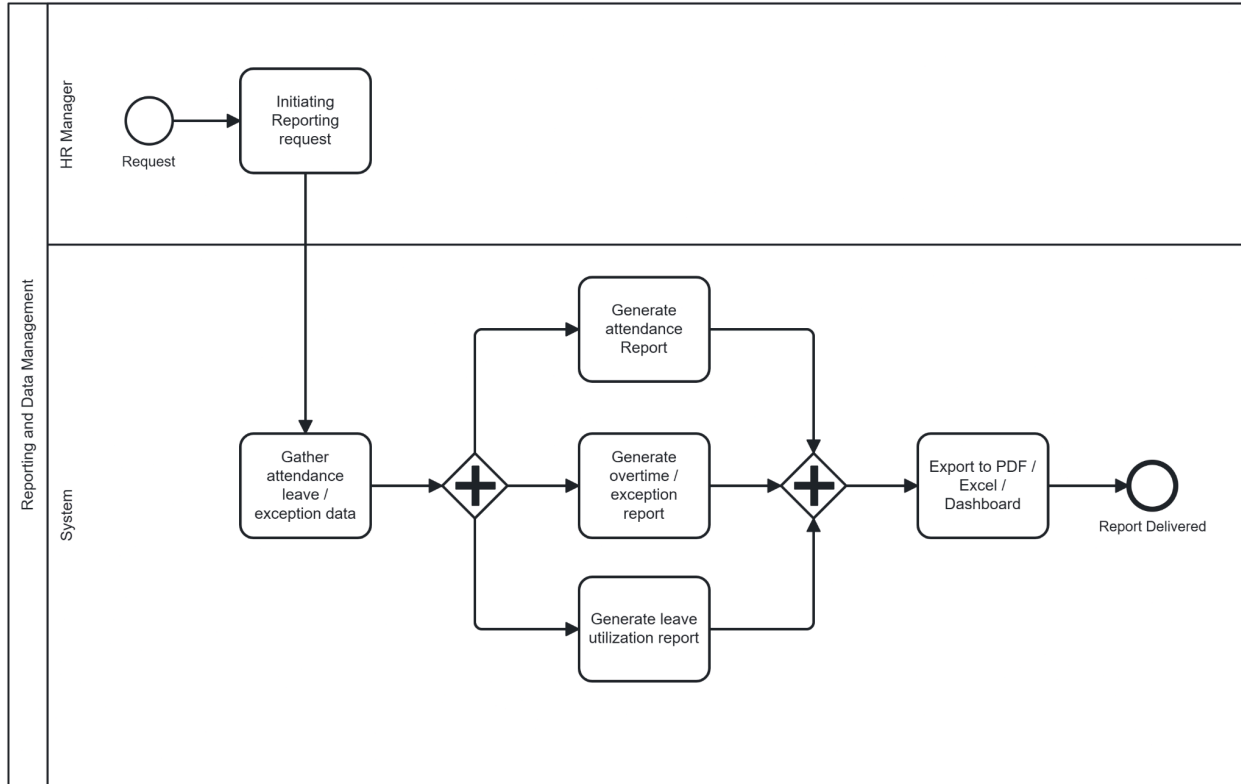

Reports can be filtered at **individual, departmental, or organizational** levels, and exported in multiple file formats (Excel, Access, text) for audits and compliance checks. Visual dashboards offer real-time insights into attendance trends, lateness percentages, and overtime utilization.

All attendance and shift data is continuously **backed up** with a retention policy, and synchronized in real-time with **payroll, benefits, and leave modules**. Every modification is timestamped and logged in an **audit trail**, ensuring full traceability and compliance for internal and external audits.

5.1. Use Cases

5.2. Business Process

5.3 User Stories

Requirement ID	Epic	User Story Summary
REQ-RP-01	Reporting & Data Management	As an HR Admin, I want to generate daily attendance summaries so that I can monitor compliance.
REQ-RP-02	Reporting & Data Management	As an HR Admin, I want weekly/monthly summaries by employee so that I can analyze patterns.
REQ-RP-03	Reporting & Data Management	As a Line Manager, I want reports by department so that I can track team performance.
REQ-RP-04	Reporting & Data Management	As a Payroll Officer, I want overtime summaries so that I can calculate pay accurately.
REQ-RP-05	Reporting & Data Management	As an HR Manager, I want late arrival logs so that I can enforce punctuality.
REQ-RP-06	Reporting & Data Management	As an HR Admin, I want exception reports for missed punches and corrections so that anomalies are tracked.
REQ-RP-07	Reporting & Data Management	As a Payroll Officer, I want to export data to Excel/Access/Text so that audits are possible.
REQ-RP-08	Reporting & Data Management	As a Line Manager, I want visual dashboards of attendance KPIs so that I can monitor trends quickly.
REQ-RP-09	Reporting & Data Management	As an HR Manager, I want time management data synced in real time with payroll/leave modules so that all records are consistent.
REQ-RP-10	Reporting & Data Management	As a System Admin, I want attendance data backed up continuously with a retention policy so that no records are lost.

Proposed Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result
TM-SM-01	Assign a shift to an employee for a term	System Admin → Shift Management → Assign Shift → Select Employee → Select Shift Name & Type → Set Start/End → Save	Shift assignment created with correct dates and details
TM-SM-02	Update shift status to Approved	System Admin → Shift Assignment → Open record → Change Status = Approved → Save	Status updated to Approved; visible in employee schedule
TM-SM-03	Define a new shift type (Split)	HR Manager → Shift Settings → Add Shift Type → Name = Split → Define segments → Save	Split type created and available for assignment
TM-SM-04	Create standard shift name (Core Hours)	HR Manager → Shift Settings → Add Shift Name → “Core Hours 8:30–4:30” → Save	Shift name saved; visible in name list
TM-SM-05	Assign schedule by Department	System Admin → Bulk Assignment → Scope = Department → Select Dept → Choose Shift → Set Term → Save	All department members receive the shift schedule
TM-SM-06	Assign schedule by Position	System Admin → Bulk Assignment → Scope = Position → Select Role → Choose Shift → Set Term → Save	All users in that position receive schedule

TM-SM-07	Assign custom weekly pattern	HR Manager → Patterns → Create “4-on/3-off” → Save → Assign to Employee → Save	Pattern saved and reflected in employee calendar
TM-SM-08	Configure split shift windows	System Admin → Shift → Type = Split → Define 08:00–12:00 & 16:00–20:00 → Save	Split windows displayed on schedule
TM-SM-09	Assign rotational shifts (Morning/Evening/Night)	HR Admin → Rotation Setup → Define cycle → Assign to Team → Save	Rotation cycle generated on calendar
TM-SM-10	Overnight shift crossing midnight	HR Manager → Add Shift → Start 20:00 → End 06:00 (+1 day) → Save	Shift spans two dates correctly
TM-SM-11	Individual custom shift override	System Admin → Employee Profile → Override Shift → Select Custom → Save	Individual override takes precedence over group
TM-SM-12	Shift expiry notification	HR Admin → Notifications → Ensure Shift Expiry Alerts ON → Advance system date near end	Alert displays for upcoming expiry

Test Case ID	Test Scenario	Test Steps	Expected Result
TM-AT-01	Biometric clock-in	Employee → Biometric Terminal → Place finger → Success	Clock-in recorded with terminal ID, timestamp
TM-AT-02	Web login clock-in	Employee → Web Portal → Attendance → Clock In	Clock-in recorded; source = Web/IP captured
TM-AT-03	Mobile clock-in with GPS	Employee → Mobile App → Enable GPS → Clock In	Clock-in recorded with GPS coordinates
TM-AT-04	Manual entry with audit	Line Manager → Attendance → Add Manual Entry → Select Employee → In/Out times → Reason → Save	Manual entry saved; audit trail captures user/time/reason
TM-AT-05	Rounding to nearest 15 mins	HR Manager → Rounding = Nearest 15 → Employee clocks 08:07	Time rounded to 08:00 or 08:15 per rule
TM-AT-06	Ceiling vs Floor rounding	HR Manager → Rounding = Ceiling → Employee clocks 08:02	Time rounded up to next interval (e.g., 08:15)
TM-AT-07	Multiple punches in a day	Employee → Clock In → Break Out → Break In → Clock Out	All punches recorded; total hours computed correctly
TM-AT-08	First In / Last Out mode	System Admin → Settings → Enable First In/Last Out → Employee makes multiple punches	Only first-in and last-out considered
TM-AT-09	Device/location tagging	System Admin → Enforce tagging → Employee clocks via device	Attendance record includes device ID / GPS/IP

TM-AT-10	Offline terminal sync	Disconnect device → Clock-in → Reconnect → Sync	Offline transactions sync successfully with timestamps
TM-AT-11	Missed punch alert to employee	Employee forgets to clock out → EOD job runs	Employee gets notification to correct
TM-AT-12	Auto-flag missed punch to Line Manager	EOD job runs → Missing out-punch detected	Record flagged on Line Manager dashboard
TM-AT-13	Payroll blocker for unresolved items	Payroll Officer → Run Payroll with flagged items	Payroll run blocked until items resolved
TM-AT-14	Daily sync to payroll/benefits	HR Admin → Trigger daily sync job	Attendance data synced successfully
TM-AT-15	Audit trail visibility	System Admin → Audit → Filter by Attendance Edits	All edits show who/what/when/old vs new

Test Case ID	Test Scenario	Test Steps	Expected Result
TM-PE-01	Configure OT categories	HR Manager → Policies → Overtime → Add Category (Weekend/Holiday) → Save	Category saved and selectable in requests
TM-PE-02	Configure Short Time rules	HR Manager → Policies → Short Time → Define Late In/Early Out → Save	Rules active and enforced
TM-PE-03	Set grace period	HR Manager → Lateness → Grace = 10 mins → Save	Lateness ≤10 mins ignored in calc
TM-PE-04	Penalty threshold	HR Manager → Lateness → Threshold = 15 mins → Save	Lateness >15 triggers penalty (e.g., 0.5 day)
TM-PE-05	Escalation after repeats	HR Admin → Misconduct Settings → Escalate after 3 violations	3rd violation auto-creates misconduct case
TM-PE-06	Employee submits correction request	Employee → ESS → New Request → Type = Missed Punch → Reason → Submit	Request status = Submitted; visible to Line Manager
TM-PE-07	Track request status	Employee → ESS → My Requests → Open record	Status timeline shows Submitted/Approved/Rejected
TM-PE-08	Line Manager approves request	Line Manager → Inbox → Open Request → Approve → Add note → Submit	Status = Approved; employee notified
TM-PE-09	Auto-escalation on timeout	HR Admin → Workflow → SLA = 3 days → Let request sit	Status changes to Escalated; next-level notified

TM-PE-10	Payroll includes only accepted permissions	Payroll Officer → Pre-Payroll Audit → Compare requests	Only Approved permissions impact pay
TM-PE-11	Min/Max hours validation	HR Admin → Permission Policy → Min=1 / Max=4 hrs → Employee submits 5 hrs	Form validation blocks > Max; shows error
TM-PE-12	Link repeated lateness to misconduct	Employee accumulates 4 late > threshold	Misconduct case auto-generated with references

Test Case ID	Test Scenario	Test Steps	Expected Result
TM-LV-01	Link vacation package to employee	HR Manager → Employee Profile → Assign Vacation Package → Save	Package linked; balances available
TM-LV-02	National holiday overrides shift	System Admin → Holiday Calendar → Add National Holiday → Save	Any shift on that date auto-marked Holiday
TM-LV-03	Organizational holiday override	HR Admin → Org Holidays → Add Event → Save	Shifts overridden for affected employees
TM-LV-04	Predefine weekly rest days	HR Admin → Schedule Settings → Select Rest = Fri/Sat → Save	Rest days blocked from scheduling
TM-LV-05	Holiday attendance rules	Line Manager → Review attendance on holiday	No lateness penalties/OT per holiday policy
TM-LV-06	Probation-specific rules	HR Manager → Employee → Probation Dates → Save → Test lateness	Probation policy applied (e.g., stricter rules)
TM-LV-07	Auto-escalation before payroll cutoff	System Admin → Workflow → Set cutoff = EOM → Leave request pending past SLA	Request escalates before cutoff

Test Case ID	Test Scenario	Test Steps	Expected Result
TM-RP-01	Daily attendance report	HR Admin → Reports → Daily → Select Date → Generate	Report shows in/out, totals, exceptions
TM-RP-02	Weekly/Monthly summaries	HR Admin → Reports → Periodic → Select Week/Month → Generate	Summaries by employee with totals
TM-RP-03	Department-level report	Line Manager → Reports → Department → Select Dept → Generate	Team attendance and KPIs displayed
TM-RP-04	Overtime summary	Payroll Officer → Reports → Overtime → Range → Generate	OT totals by employee/category
TM-RP-05	Late arrival log	HR Manager → Reports → Lateness → Range → Generate	Late incidents with minutes over threshold
TM-RP-06	Exception report (missed punches)	HR Admin → Reports → Exceptions → Range → Generate	List of missed punches & correction status
TM-RP-07	Export to Excel/Text	Payroll Officer → Reports → Select → Export = Excel/Text	File downloaded in selected format
TM-RP-08	Visual dashboards	Line Manager → Dashboard → View KPIs & charts	Visual trends load correctly
TM-RP-09	Real-time sync verification	HR Manager → Trigger Sync → Check Payroll/Leave records	Data matches across modules

TM-RP-10	Backup & retention policy	System Admin → Backup Settings → Set retention → Run backup	Backup completes; retention policy applied
TM-RP-11	Audit trail export	System Admin → Audit → Filter by Time Management → Export	Export contains timestamp, user, before/after
