Human Capital Management - Leaves

FUNCTIONAL SPECIFICATION DOCUMENT

Executive Summary

The **Leaves Management Module** is a key component of the HR software, designed to simplify and automate the full leave lifecycle for employees and HR personnel. It allows employees to request, modify, or cancel leaves, upload supporting documents, and track their leave status and balances in real time. Managers, HR staff, and coordinators can review, approve, or reject requests based on predefined roles and policies, with support for delegation and notifications. The module also enables administrators to configure leave types, entitlements, holidays, and system permissions, while offering reporting tools for data-driven HR decisions. Overall, it improves efficiency, ensures policy compliance, and enhances the employee experience.

Business Processes

1. Manage Leave Policies and Rules

This process governs the configuration, maintenance, and enforcement of all leave-related rules, policies, and entitlement structures within the system.

It enables authorized administrators (HR Admin, Legal/Policy Admin, System Admin) to define leave types, eligibility rules, entitlements, policy versions, working hours, public/holiday calendars, and leave days to employees for each type of leave. These configurations ensure that all leave requests are validated against consistent, up-to-date criteria and that system behavior adapts automatically to policy changes.

It also includes the ability to adjust leave balances manually (e.g., corrections, carry-overs), configure employee type rules, and manage user roles and permissions for leave-related actions. Holiday calendars and working hour settings maintained here directly impact leave entitlement calculations and scheduling.

1.3. User Stories

Requirement ID	Epic	User Story Summary
REQ-001	Admin Setup	As an HR Admin, I want to initiate the leave configuration process so that I can define and manage leave policies within the system.
REQ-002	Admin Setup	As an HR Admin, I want to authenticate my administrator credentials so that I can securely access the leave configuration settings.
REQ-003	Admin Setup	As an HR Admin, I want to configure leave settings (e.g., accrual rates, maximum carry-over, waiting periods) so that the system adheres to our organizational policies.
REQ-004	Admin Setup	As an HR Admin, I want to validate and apply configurations so that the changes I make are checked for errors and implemented in the system
REQ-005	Admin Setup	As an HR Admin, I want to update entitlement calculations and scheduling logic so that leave balances are accurately computed and scheduling respects the new rules.
REQ-006	Admin Setup	As an HR Admin, I want to create and manage different leave types (e.g., vacation, sick leave, personal leave) so that employees can request appropriate leave categories.
REQ-007	Admin Setup	As an HR Admin, I want to set eligibility rules for each leave type (e.g., minimum tenure, employee type) so that leave is granted according to company policy.
REQ-008	Admin Setup	As an HR Admin, I want to assign personalized leave entitlements to individual employees or groups so that specific agreements or adjustments can be accommodated.
REQ-009	Admin Setup	As an HR Admin, I want to configure leave parameters such as maximum duration, notice periods, and approval workflows so that the leave process is clearly defined and manageable.
REQ-010	Admin Setup	As an HR Admin, I want to set calendars and blocked days (e.g., public holidays, company closures) so that these are automatically considered in leave calculations and scheduling.
REQ-011	Admin Setup	As an HR Admin, I want to configure special absence/mission types (e.g., bereavement, jury duty) with specific rules so that these unique leave scenarios are handled correctly.

Requirement ID	Epic	User Story Summary
REQ-012	Admin Setup	As an HR Admin, I want to define legal leave year and reset rules so that leave balances are reset according to the applicable regulations and company policy.
REQ-013	Admin Setup	As an HR Admin, I want to manually adjust employee leave balances (e.g., for corrections, carry-overs, or one-time grants) so that leave records are accurate.
REQ-014	Admin Setup	As an HR Admin, I want to manage user roles and permissions related to leave (e.g., who can request, approve, or view leave) so that access is controlled and secure.

2. Manage Leave Requests

Description This process covers the full lifecycle of a leave request from initial submission to final closure.

It begins when an employee submits a new leave request with details such as leave type, dates, justification, and any required attachments. The system validates the request against predefined policies, leave balances, and eligibility criteria. If valid, the request is routed to the designated approver (Direct Manager), if approved, the request is sent and finalized by the HR Manager. The approver can approve, reject, or return the request for correction. The system supports modifications and cancellations for pending requests, bulk approvals/rejections, overrides by HR, and delegation of approval authority to another manager during absences. All actions trigger notifications to relevant stakeholders and are logged for audit purposes. This process also includes specialized verification workflows such as medical leave document validation.

2.3. User Stories

Requirement ID	Epic	User Story Summary
REQ-015	Request and Modify Leave	As an employee, I want to submit a new leave request with details (leave type, dates, justification, and attachments) so that my absence can be reviewed and approved according to company policy.
REQ-016	Request and Modify Leave	As an employee, I want to attach documents (e.g., a doctor's note) to my leave request so that HR and my manager have the required proof for specialized leave types.
REQ-017	Request and Modify Leave	As an employee, I want to modify a leave request so that I can correct mistakes or update details without having to start over.
REQ-018	Request and Modify Leave	As an employee, I want to cancel my leave request before final approval so that it does not proceed unnecessarily.
REQ-019	Notification System	As an employee, I want to receive notifications when my leave request is approved, rejected, returned for correction, or modified so that I am always informed about the progress.
REQ-020	Review and Approve Requests	As a direct manager, I want to review leave requests assigned to me so that I can ensure team operations are not disrupted.
REQ-021	Review and Approve Requests	As a direct manager, I want to approve leave requests so that employees can take time off according to policy.
REQ-022	Review and Approve Requests	As a direct manager, I want to reject leave requests that do not meet operational or policy requirements so that the employee is informed and operations are maintained.
REQ-023	Review and Approve Requests	As a direct manager, I want to delegate my approval authority to another manager during my absence so that leave requests are processed without delay.
REQ-024	Notification System	As a direct manager, I want to receive notifications when a new leave request is assigned to me so that I can review it promptly.
REQ-025	Review and Approve Requests	As an HR manager, I want to finalize approved leave requests in the system so that employee records are updated and payroll is adjusted accordingly.

Requirement ID	Epic	User Story Summary
REQ-026	Review and Approve Requests	As an HR manager, I want to override a manager's decision in special circumstances so that exceptions to policy can be handled appropriately.
REQ-027	Review and Approve Requests	As an HR manager, I want to process multiple leave requests at once so that large volumes of requests can be managed efficiently.
REQ-028	Review and Approve Requests	As an HR manager, I want to verify medical leave documents so that only legitimate claims are approved.
REQ-029	Review and Approve Requests	As an HR manager, I want the system to automatically update leave balances after final approval so that records remain accurate.
REQ-030	Notification System	As an HR manager, I want the system to notify the employee, the employee's manager, and the attendance coordinator when a leave request is finalized so that everyone is informed.
REQ-031	Request and Modify Leave	As an employee, I want to be able to submit my leave request after the leave by a maximum configured period, so that I can submit my leave after taking it due to emergencies

3. Track and Monitor Leaves

Description This process focuses on visibility, oversight, and analytics for all leave-related data across the organization.

It enables authorized users, such as employees, managers, HR admins, and coordinators to view and track leave balances, leave history, and request statuses in real time. The process also supports filtering and sorting based on various parameters (leave type, department, date range, status) and allows managers or HR staff to monitor patterns, spot irregularities, and take corrective actions. It also ensures that historical leave records are maintained for reference and that irregular leave patterns (e.g., repeated sick leaves) are flagged and escalated.

3.1. Use Cases

3.2. Business Process

3.3. User Stories

Requirement ID	Epic	User Story Summary
REQ-031	Track Leave Information	As an employee, I want to view my current leave balance so that I can plan my future leave requests.
REQ-032	Track Leave Information	As an employee, I want to see my past leave requests and their statuses so that I can keep track of my leave usage over time.
REQ-033	Track Leave Information	As an employee, I want to filter and sort my leave history by leave type, date range, and status so that I can quickly find specific requests
REQ-034	Leave Reports and Records	As a manager, I want to view my team members' leave balances and upcoming leaves so that I can manage workloads effectively.
REQ-035	Leave Reports and Records	As a manager, I want to filter and sort leave data by leave type, date range, department, and status so that I can quickly analyze patterns.
REQ-036	Leave Reports and Records	As a manager, I want the system to highlight patterns in my team's leave usage so that I can spot potential scheduling conflicts or attendance issues.
REQ-037	Leave Reports and Records	As a manager, I want to be alerted if any employee has irregular leave patterns so that I can take appropriate action.
REQ-038	Leave Reports and Records	As a manager, I want to review flagged irregularities and decide on corrective actions so that attendance issues are addressed promptly
REQ-039	Leave Reports and Records	As a direct manager, I want to be able to flag irregular leaving patterns in employees' leave history
REQ-040	Leave Reports and Records	As an HR Manager, I want the system to automatically add leave days to each employee's balance according to company policy so that entitlements stay accurate without manual calculation
REQ-041	Leave Reports and Records	As an HR Manager, I want to year-end/period carry-forward to run automatically so that unused days move correctly within caps and expiry rules
REQ-042	Leave Reports and Records	As an HR Manager I want to accrual suspension/adjustment during unpaid leave or long absence so that balances reflect true entitlement

Requirement ID	Epic	User Story Summary
REQ-042	Leave Reports and Records	As an HR Manager I want to to automatically sync with the payroll system in real-time so that salary deductions or adjustments are calculated without delays

Proposed Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result
F-01	Submit new leave request	Employee fills in leave type, dates, justification, and (if applicable) uploads attachment; submits request	Request saved with “Pending Approval” status and visible to assigned approver
F-02	Modify or cancel pending request	Employee selects existing pending request; edits details or cancels	Request updated or cancelled; status/history reflects change; approver notified if applicable
F-03	Approve/reject leave request (Manager)	Manager reviews assigned request; approves or rejects with reason	Status updated; employee notified; balance holds applied if approved
F-04	Delegate approval authority	Manager delegates approval to another manager	Delegate can view and act on pending requests; original manager notified
F-05	Finalize leave (HR)	HR reviews approved requests; finalizes record	Leave balance updated; payroll impact recorded; notifications sent
F-06	Override manager decision (HR)	HR changes an approved/rejected decision	Status updated; audit log entry created; relevant parties notified
F-07	Bulk request processing (HR)	HR selects multiple pending requests and processes them in one action	All processed requests show updated statuses; balances updated where needed
F-08	Document verification (HR)	HR opens request with medical leave; verifies uploaded document	Status updated accordingly; rejection if invalid
F-09	View and filter leave data	User selects filters (leave type, department, date range, status)	Results displayed per filter; export/download if available
F-10	Notification triggers	Perform actions that trigger notifications (approval, rejection, return, modification, cancellation, finalization)	Correct recipients receive accurate notifications in real time

Test Case ID	Test Scenario	Test Steps	Expected Result
F-11	Historical record access	User views past leave history	Accurate, immutable record displayed; filterable and searchable
F-12	Irregular pattern detection	System processes leave data and flags repeated patterns (e.g., frequent sick leave)	Flag displayed in dashboard/report; alert sent to HR/manager
F-13	Post leave request submission	System overrides attendance on same dates of accepted leaves as “on leave” instead of absent	All appropriate dates are overridden
